Storyline: In the year 2030, a new civilization has arisen from the ruins of the former United States, the country that was gone in the hands of drug-addicts and feared criminals of America. This is a new civilization, Shinaigara (the Legendary World) this is the place where God and his children and yet to be seen for now. Welcome to the new world...! Since its second year, Shinaigara has been the paradise of animals and humans, united as the clans. They have a common goal, which is to live and avoid attacks from the clan called Nostra. Nostra is an extremely powerful organization whose goal is to get rid of the clans. They are so powerful that they have been controlling the whole world, and even they are involved in the creation of Shinaigara. For now, the systems have been set in place, but the final decision is in the hands of the Great Maker who will decide the destiny of the world. Experience X3 - Ghost Sync Download [Mac/Win]

For a set number of uses you can experience the Ghost Sync world. The Ghost Sync world is independent of any game experience you gain and can be set to any number of times. The Ghost Sync world takes place in a completely new game account that is independent of any previous game experiences. All stats and items carry over, only currency is different and usable in the Ghost Sync world. Gems and currencies can be used in both the original worlds and the new Ghost Sync worlds. Other than this the Ghost Sync worlds are identical to the regular game experience. Options x3 A new possibility to change settings. Other Settings -Item experience gain: changed from +200% to +400%. -Disappear during conversation: You can set this option on or off, with this option you will not be able to use certain features such as asking about the skill level of the person you are chatting to. -Facial expression: Set this option to remove the shadowless areas on characters. -Enabled: Include data when using the data source settings menu. Show Settings: Shows all options at once. Smart Switch: Lets you switch with other players more easily. Show Limit: Shows a number on the top left of the HUD. Max Amount: Shows the maximum amount of data that can be used in one game. All prices remain the same but you pay a larger price. All descriptions on NPC's and shops remain the same. The descriptions on some items have been changed so the exact same item will have a different item ID. Valuable items such as cases, items, portraits and book notes in archive shops are re-drafted to make them more useful. Memory Load: Memory load is a feature that you can use to load new data into your memory. The cost of this is 10 Memory Load, but the more memory load you use the more cost-effective it will be. You can use Memory Load to quickly reload data on the world. When in the Memory Load menu you can switch between all data files you have, thus also the changes to data on the game and the archive shop. You can also set the available data that will be loaded in the Memory Load menu. (Example: Only the most recent items from the archive will be loaded. Also, only the five most recent boats from the water museum will be loaded.) 'Archives' will not be loaded into memory because it will take too long to load d41b202975
