When did all the magic go out of the world? Travelling through the wilds of Davidcom, where only the occasional Golden Dragon does battle. While his fire and foam subdues the Heroes and all comers, Surborg is alone, on his ship. Without an ally, a place to lay his head. You ride the Dragon's back into the most guarded, hidden castle in all of Davidcom. The Knights wait in ominous silence. A cloud of fog rolls in, bringing the rattlesnake to slither across the floor, slipping by unseen. A plague of insects rips apart strange statuettes that once stood in midst and admire, the face of the Harbinger shining brightly in the incessant light. Yes, there's a goodly piece of magic in this castle, good magic that lurks undiscovered, tucked away in the shadows. And now it has a new purpose, and only the bravest, the smartest, the most persistent will be chosen to enter the castle, and win the Dark Crown. Get both the McGuffin and Token lists below!

When a strange meteor fell to Earth, it caused a mysterious explosion that annihilated most of the planet. A new series of terrifying Zeonite vipers are entering the world with high-powered volt weapons, and UN Nauk headquarters in Tokyo has discovered the source of these new vipers: the "Unreal Vipers." Developing in secret, the vipers are said to be the product of the same technology that created Gundam's terrifying Zeon-clone mobile suits. With no means of communication, the humans on Earth are completely unprepared for the vipers' arrival and the alliance uniting UN forces around the world is forced to act. Meanwhile, the robotic machines of the GATs hope to support mankind in the last-ditch effort to protect the human race. If you enjoyed this review, you're encouraged to support us through Patreon. How to buy social network customers - edw519 ===== wmeredith Out of curiosity, are these a new business model? It seems like this information could be helpful to someone who wants to get into or maintain a social network (like, say, twitter, facebook) but without the crowdsourcing that's always present in these efforts. ~~~ cstejerean Going back to the discussion in the article about "what is better" (spending money to build a social network, or going after users who are already on social networks), they apparently were coming from a social networking company that was not generating enough revenue.
